COMMENT LINKEDIN

Run your LinkedIn with a free Claude skill: complete setup guide

A free, open-source bundle of LinkedIn skills for Claude. It drafts posts, comments and replies in your voice and waits for your OK before anything goes out.

What it is

sergebulaev/linkedin-skills on GitHub. MIT licence, free. It works inside Claude (Claude Code, the Claude desktop app or claude.ai on a paid plan) and other AI agents that read skill files.

> **You stay in control:** every skill shows you a draft and waits for your approval. Nothing is posted on its own unless you connect an auto-post tool yourself.

What it can do for a job seeker

	SKILL	WHAT IT DOES
👤	Profile Optimizer	Rewrites your headline, About, Featured and Experience for the role you want
✍️	Post Writer	Drafts posts with proven hooks
📅	Content Planner	A 7-day plan: topics, formats, hooks, posting times
🤖	Humanizer + Post Audit	Removes AI-sounding lines and checks a draft before you post
💬	Comment Drafter	Drafts a comment on any post from its link, e.g. a recruiter's hiring post
↩️	Reply Handler	Drafts replies to comments on your posts
🎙️	Interviewer	Asks you questions to build a story bank, so posts sound like you

The repo has 12 skills in total, including Hook Extractor, Repurposer, Engagement Monitor and Employee Advocacy.

Setup in 5 minutes

Option A: Claude desktop app or claude.ai (paid plan with code execution on)

1. Open **Customize → Plugins**.
2. Add the marketplace from the repository `sergebulaev/linkedin-skills`.
3. Install the **linkedin-skills** plugin from Discover.

Option B: Claude Code (type these inside Claude Code)

```
/plugin marketplace add sergebulaev/linkedin-skills
/plugin install linkedin-skills@linkedin-skills
```

Option C: any agent (in your terminal)

```
npx skills add sergebulaev/linkedin-skills
```

Your first 3 prompts

1. **Profile:** "Use the profile optimizer. I'm looking for *[role]* jobs in *[city/country]*. Here is my current headline and About: …"
2. **Posts:** "Use the content planner to make my 7-day LinkedIn plan for a *[role]* job seeker, then draft Monday's post."
3. **Recruiters:** find hiring posts for your role on LinkedIn, then: "Use the comment drafter on this post: *[link]*. Keep it genuine and specific." Post it yourself after you approve.

> **Keep it human:** read every draft before you post, add one real detail from your own work, and never spam the same comment on many posts. Recruiters notice.

Optional extras

The repo also supports auto-posting (Publora) and reading LinkedIn data (Apify). Both are optional; without them the skills simply give you text to paste. See the repo README for setup.

Next step: get your CV ready too

A strong LinkedIn gets recruiters to your CV. Our tool checks your CV for jobs abroad, tells you which country fits your profile, and lists the official job portals.
